

# SAAFIR HALE

Network & Infrastructure Engineer | Enterprise Networking • 802.1X / NAC • Security

Atlanta, GA • (408) 337-7841 • saafirhale@gmail.com

[linkedin.com/in/saafir-hale-187022281](https://www.linkedin.com/in/saafir-hale-187022281)

## SUMMARY

Infrastructure and network engineer focused on multi-site enterprise networking, identity-based access control, and automation. Led a 30-location 802.1X/RADIUS (EAP-TLS) wireless authentication rollout with RADIUS/NPS hosted in Microsoft Azure, administers 30 Cisco Meraki network environments, and automates operations with Python and PowerShell. Supports 300+ client organizations across a managed-services environment. CompTIA A+ certified; Network+ in progress.

## TECHNICAL SKILLS

**Networking:** 802.1X / RADIUS / EAP-TLS, Network Access Control (NAC), Cisco Meraki (SD-WAN, switching, wireless), Firewalls, VLANs, VPNs, DNS, DHCP, TCP/IP, SSO

**Identity & Cloud:** Microsoft Entra / Azure AD, Azure (RADIUS/NPS, ADACS), Microsoft 365, Intune, Windows Autopilot, Google Workspace

**Automation & Scripting:** PowerShell, Python, large-scale data migration, scheduled reporting pipelines

**Security:** Incident Response, SentinelOne, Wazuh, OpenCTI, Microsoft Defender

**Tools & Platforms:** Cisco Meraki Dashboard, Auvik, ServiceNow, NinjaOne, CloudRadial, Hudu, RMM

## EXPERIENCE

**Symphona** — Smyrna, GA

Aug 2024 – Present

*Junior SecOps Analyst & Infrastructure Engineer*

Nov 2024 – Present

- Led a 30-location enterprise 802.1X wireless authentication deployment using EAP-TLS, with RADIUS/NPS hosted in Microsoft Azure for centralized, certificate-based network access control.
- Administer 30 Cisco Meraki network environments — firewalls, switches, and access points — troubleshooting connectivity, configuration, and performance issues.
- Standardized zero-touch Windows provisioning across client sites using Microsoft Intune and Windows Autopilot.
- Built Python and PowerShell automation for an ITGlue-to-Hudu migration of 300+ client organizations and tens of thousands of assets — 95% first-pass success, with a reconciliation script recovering the remainder.
- Resolve 200+ security incidents (BEC, account takeovers, malware, phishing) using SentinelOne, Wazuh, OpenCTI, and Microsoft Entra.
- Serve as CloudRadial SME for 50+ VIP clients; recognized SME for Hudu and NinjaOne.

*IT Support Analyst — Intern*

Aug 2024 – Nov 2024

- Completed a stalled Auvik-to-CloudRadial network-data migration for 50+ companies within one week.
- Mapped servers, access points, and firewalls onsite and deployed RMM agents across client sites.
- Integrated Google Workspace SSO and authored 750+ knowledge-base articles spanning Microsoft, Google, and iManage platforms.

## PROJECT HIGHLIGHT

- Enterprise 802.1X / EAP-TLS Deployment (30 sites) — Designed and rolled out certificate-based WPA2-Enterprise Wi-Fi: ADACS certificate autoenrollment via GPO, NPS/RADIUS policy configuration on Azure-hosted domain controllers, and CRL/CDP reachability validation across split VPN topologies.

## CERTIFICATIONS & EDUCATION

CompTIA A+ • CompTIA Network+ (in progress) • Google Data Analytics Professional Certificate (Coursera)

**B.S. in Cybersecurity and Information Assurance** — Western Governors University (Anticipated Early 2027)
